

ENGINEERING, CERTIFYING, MANUFACTURING.

Ergo-Tec - Your Partner for Custom Medical Device Solutions.

MEDICAL DEVICE DEVELOPMENT YOU CAN RELY ON

For more than 25 years, Ergo-Tec has specialized in engineering, certifying, and manufacturing medical devices - with a strong focus on advanced patient positioning systems. This includes examination tables, treatment chairs, and customized equipment for practices, hospitals, and therapy environments.

Our ISO 13485-certified quality system and an experienced team ensure dependable processes and consistent, exceptional product quality.

ONE-STOP MEDICAL DEVICE SERVICES

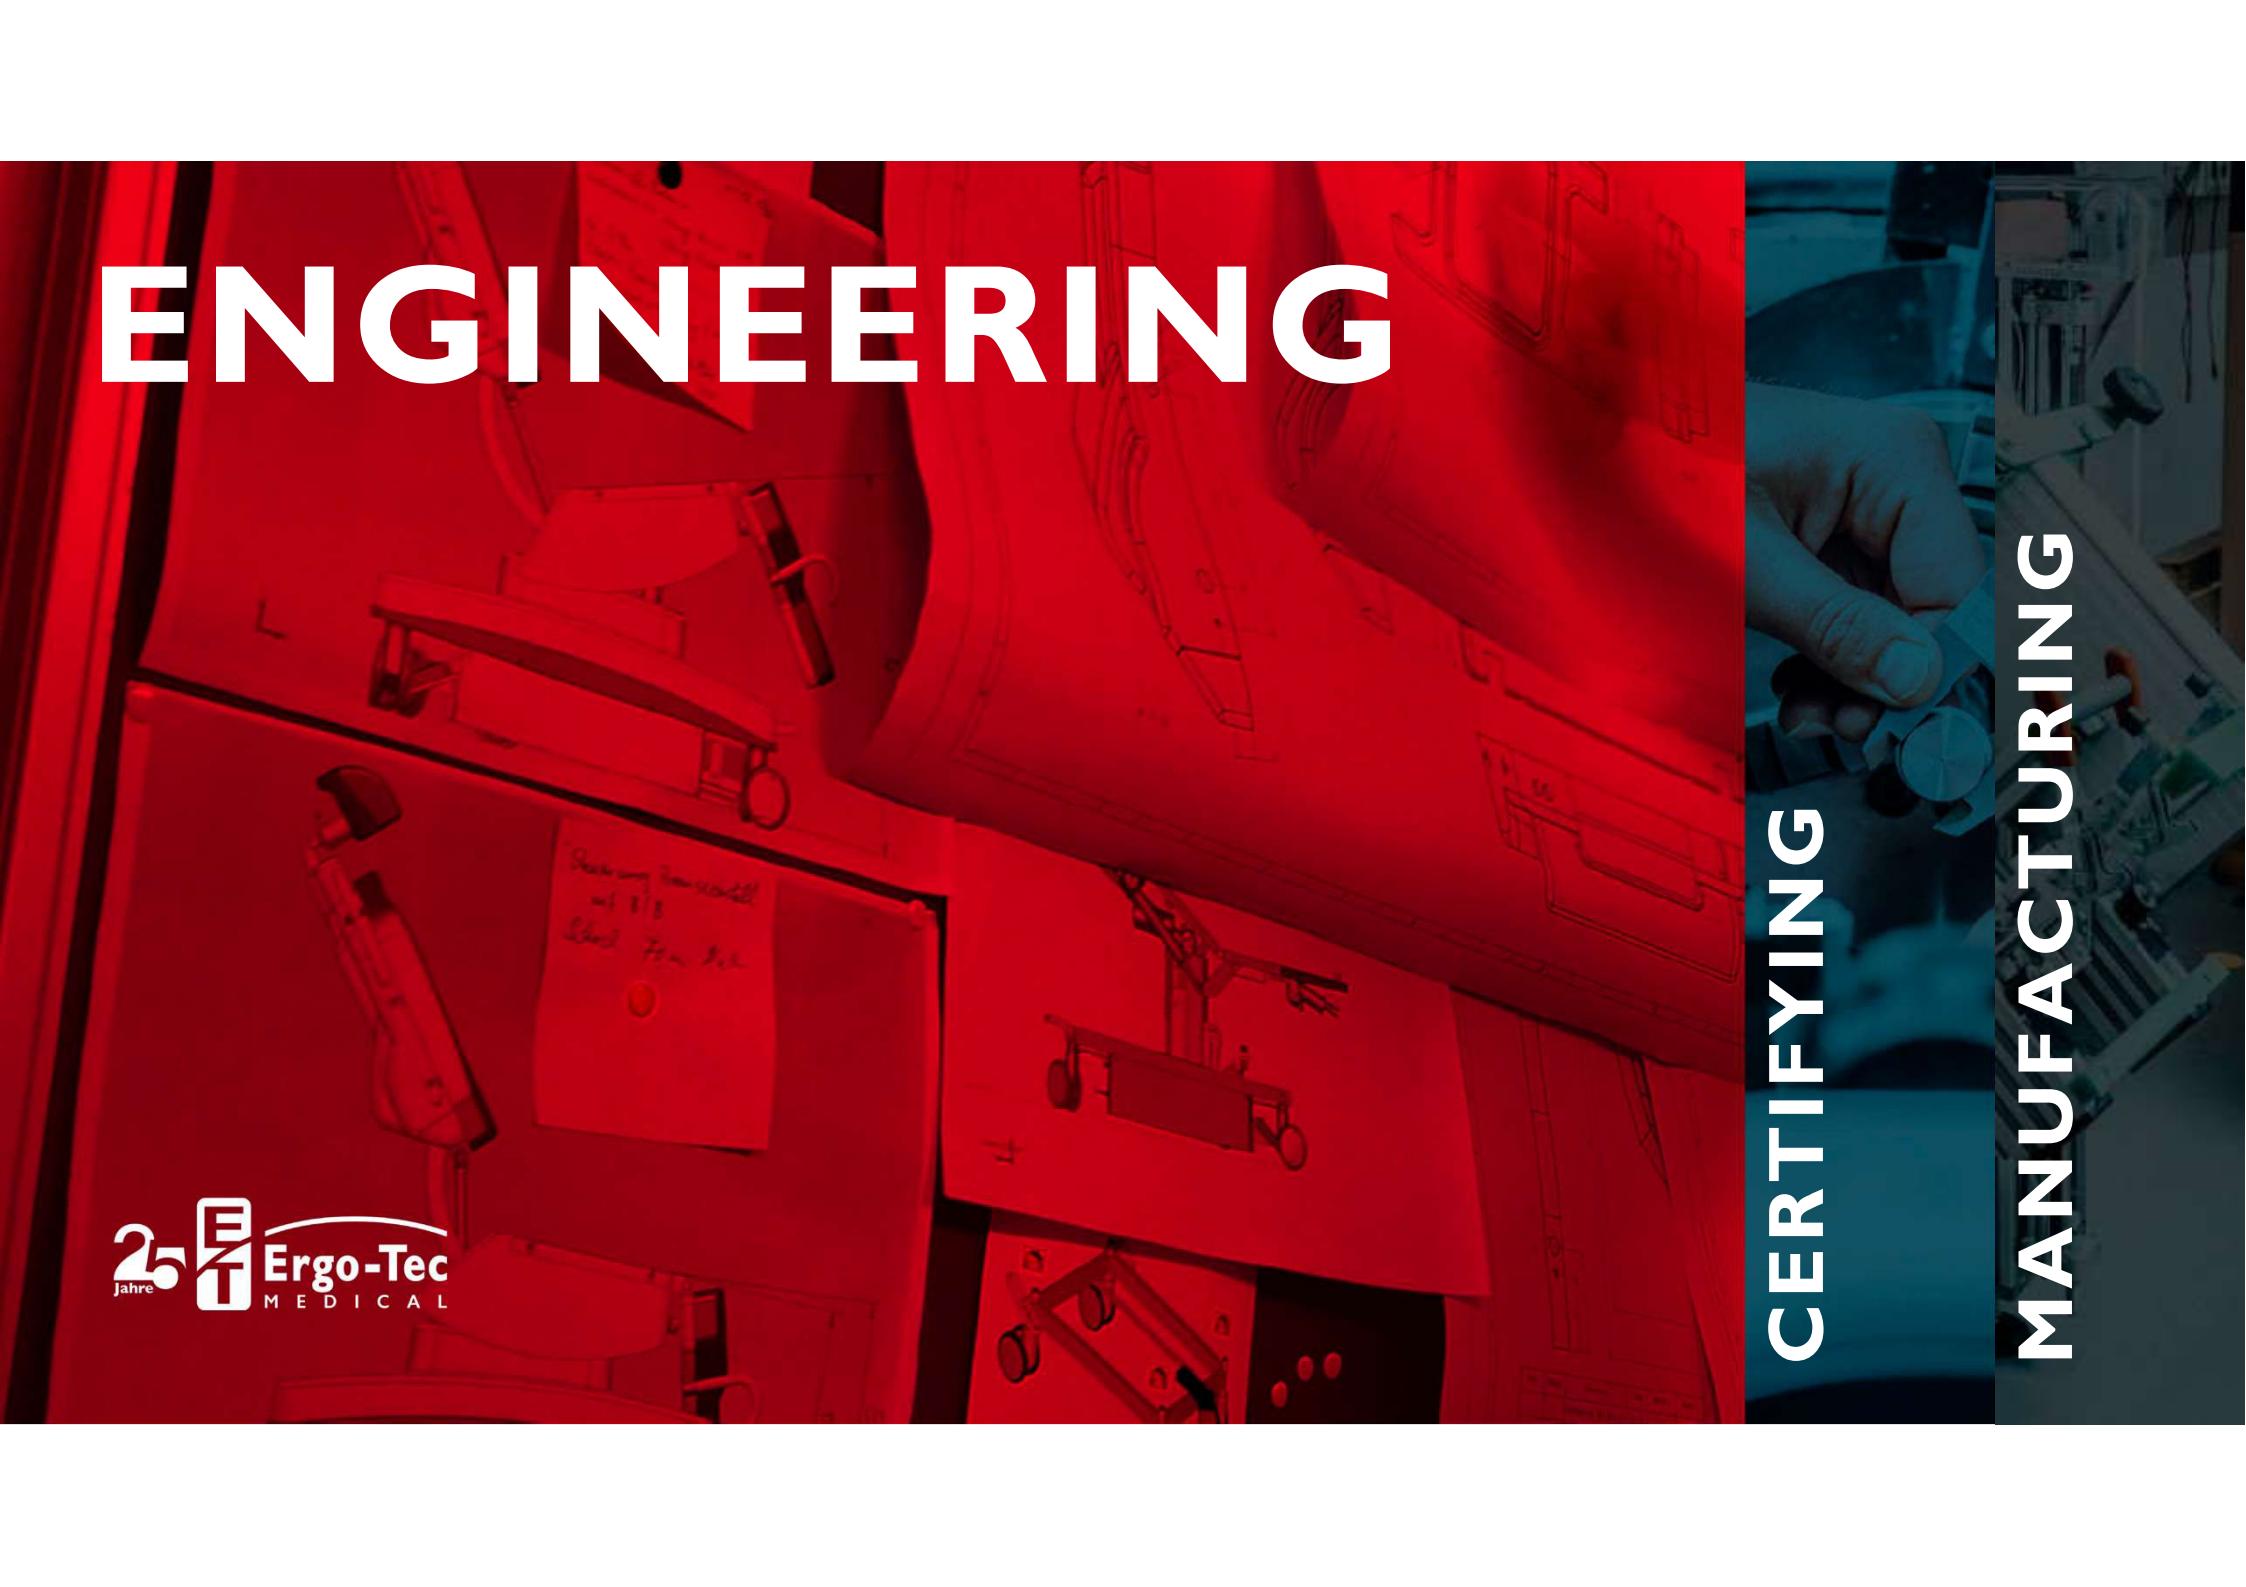

Planning to develop and produce a medical device?

Ergo-Tec helps you turn your concept into a certified, market-ready product - precisely engineered, efficiently executed, and built according to your specifications. You benefit from a partner who understands your requirements, brings practical engineering insight to the project, and delivers solutions that move your product forward.

We support the entire process - or selected phases - depending on what your organization needs.

ENGINEERING

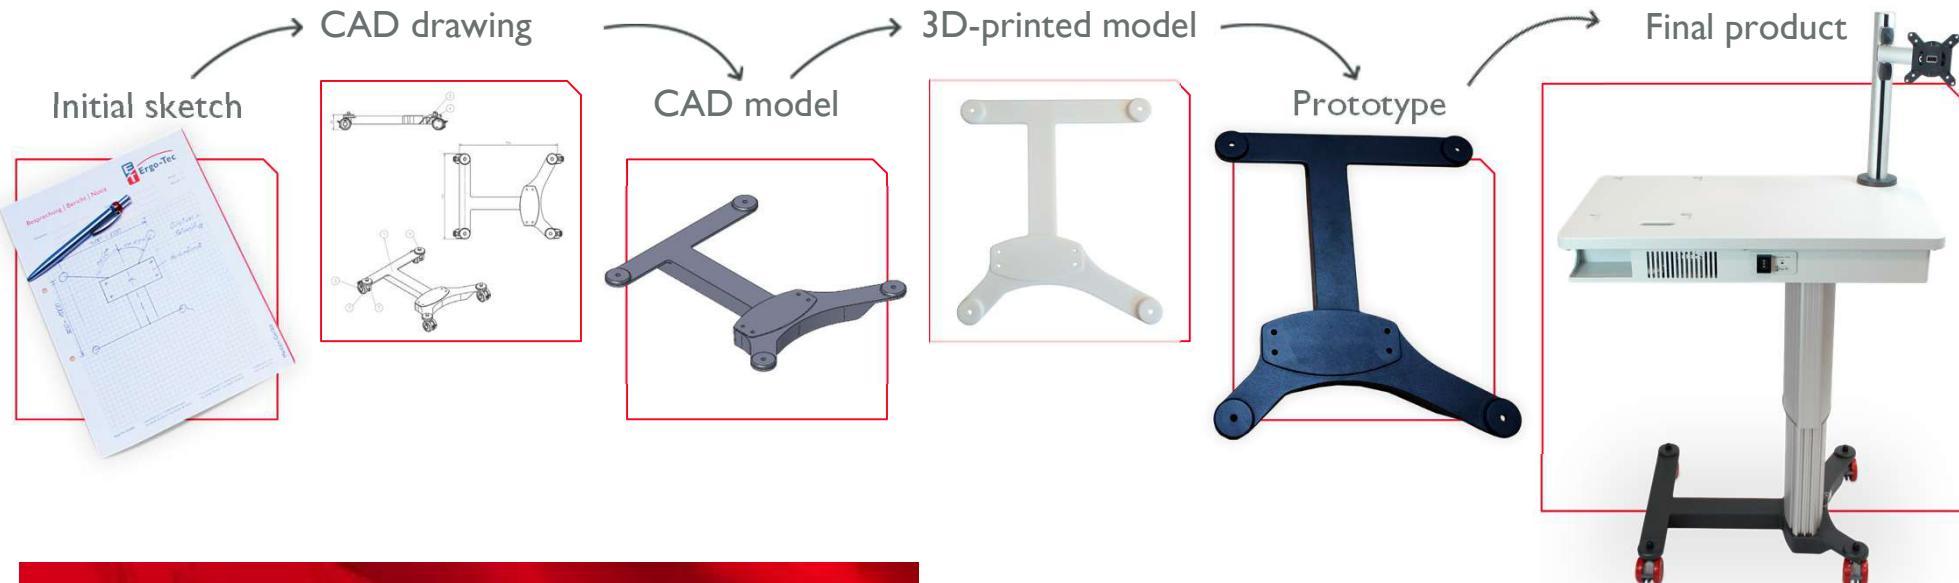

CERTIFYING

MANUFACTURING

YOUR CONCEPT, OUR EXPERTISE

You share your idea — we turn it into your customized medical device.

Using modern technologies such as CAD engineering, 3D rendering, 3D printing, and 3D scanning, we create tailored prototypes and accelerate development.

Engineering

INTELLIGENT ENGINEERING

We ensure maximum precision at every stage of product development.

- **Clear planning:**

Gives you a clear plan and defined requirements from the start.

- **Precise CAD design:**

Shows you detailed CAD models, simulations, and drawings to ensure optimal functionality and manufacturability.

- **Rapid prototyping:**

Provides early insight and refinement without full production costs.

- **Technical optimization:**

Improves ergonomics, usability, durability, and cost efficiency of your products.

- **Iterative improvement:**

Regular reviews help us adapt the design step by step.

From CAD model to ready-to-use product:

We work closely with your team to develop a solution that fits your clinical application and production strategy.

CERTIFYING

MANUFACTURING

ENGINEERING

CERTIFYING MADE STRAIGHTFORWARD

For a clear, streamlined approval process.

The regulatory approval of medical devices is complex - and essential. We support you throughout the entire certification pathway so your product meets all required standards, reliably and efficiently.

- Risk analysis
- Documentation
- In-house testing (e.g., tilt test, load test)
- Product certification
- ISO 13485–certified processes.

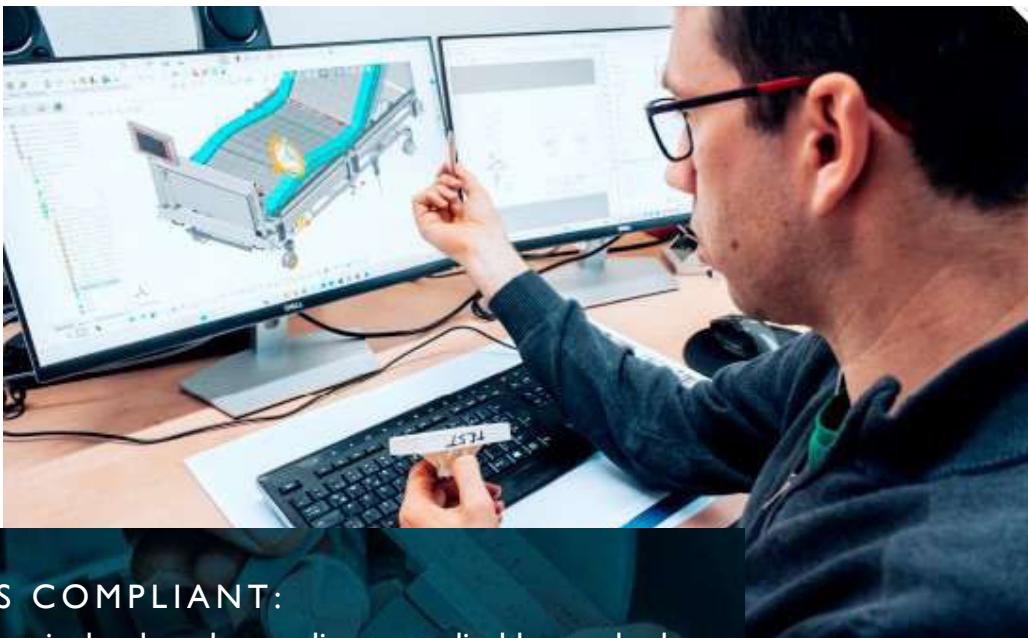

CERTIFYING

Ergo-Tec
MEDICAL

ENSURING YOUR MARKET SUCCESS

Want to ensure your product meets all regulatory requirements?

- **Complete documentation** - from risk analysis to certification - gives you a fully prepared approval package.
- **In-house testing** provides verified functionality, robust construction, and documented safety for users and patients.
- **Full traceability** via 2D scanning and an integrated ERP system ensures maximum transparency and compliance at every step.

ALWAYS COMPLIANT:

Your product is developed according to applicable standards and guided safely through the entire approval process.

MANUFACTURING

CERTIFYING

RELIABLE MANUFACTURING

Which tasks can you confidently hand over to Ergo-Tec?

From sourcing and assembly to testing and global shipping - every step can be handled for you, so your internal resources stay focused on what matters most.

Project planning and coordination can also be managed on your behalf to save your team time and capacity.

- Supplier sourcing
- Material procurement
- Quality inspection
- Series production
- Domestic and international shipping

PROVEN SUPPLY CHAINS:

Reliable planning and on-time delivery - backed by a stable network of long-standing, audited partners.

MANUFACTURING

RELIABLE IN EVERY PROJECT

Have a developed product and need a partner to produce it?

Ergo-Tec supports start-ups, manufacturers facing capacity limits, or companies looking to outsource - flexibly and cost-effectively.

We manufacture assemblies and complete devices in small to medium series - always with full traceability. Our ERP-supported production system ensures consistent quality, optimized lead times, and complete transparency.

If needed, supplier sourcing can be handled for you with a focus on cost efficiency and availability - so your team can stay focused on core priorities.

- Assembly of sub-systems
- Final device assembly
- Wiring

ERP SYSTEM

All processes at Ergo-Tec are fully integrated, ensuring complete traceability at every step.

WHY ERGO-TEC?

Ergo-Tec understands what your project needs.

INNOVATIVE

Turns your ideas into practical solutions using modern technology and solid engineering expertise.

FLEXIBLE

Engineering, manufacturing, or both - scalable to match your exact requirements.

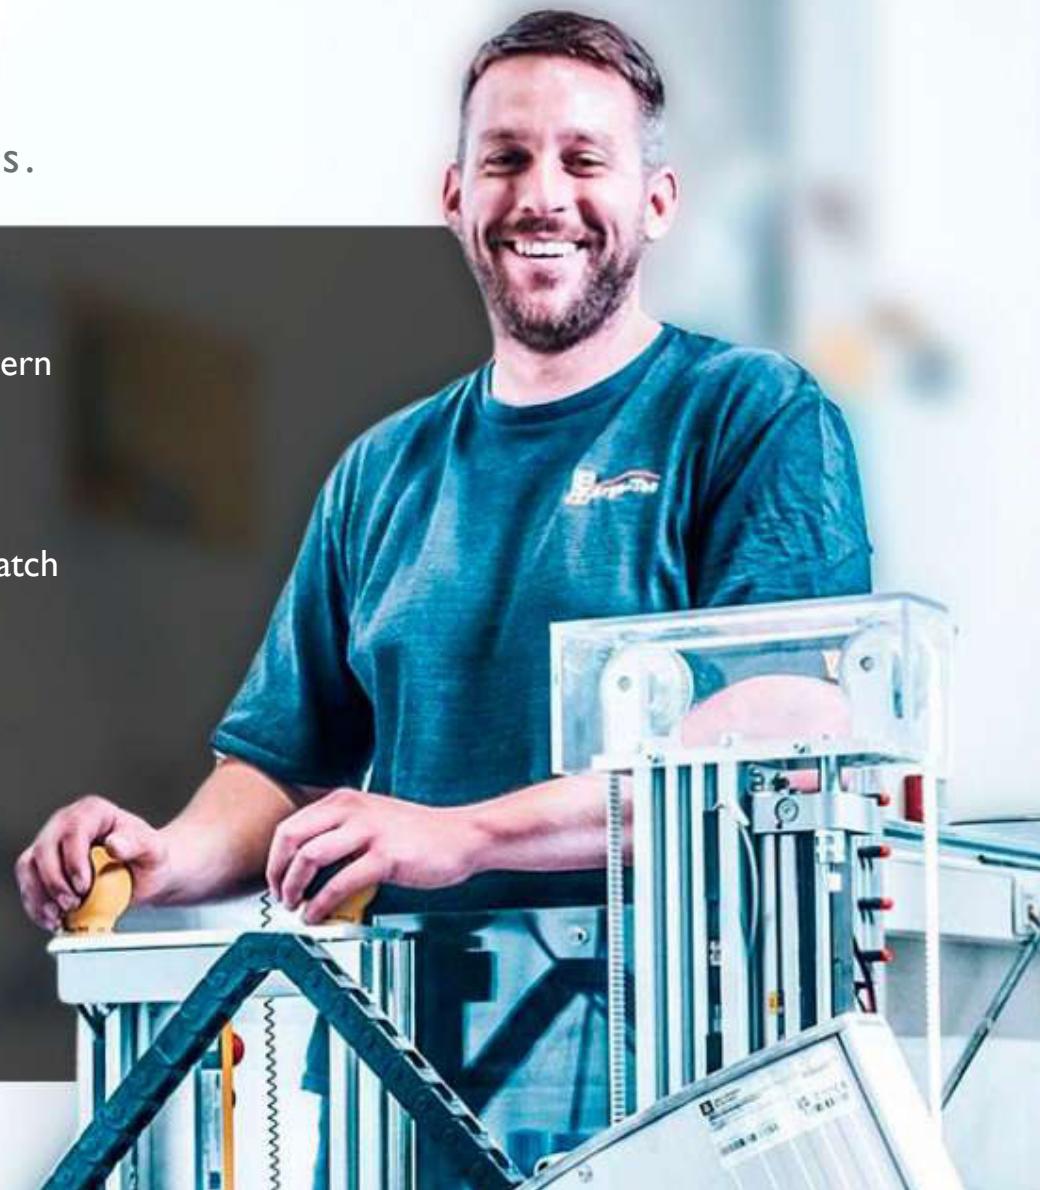

RELIABLE

Delivers consistent quality you can depend on at every stage.

ECONOMICAL

Optimized processes reduce cost and increase production efficiency.

ENGINEERING, CERTIFYING, MANUFACTURING - OR ALL OF IT:

We work to move your project forward.
